

Subaru 2ltr Diesel Oil Reset Cheat Sheet

Cheat sheet for Subaru diesel oil counter reset:

Follow these steps carefully. If you make a mistake, start again.

start engine
depress & hold brake pedal
turn rear demister on
turn parker/clearance light on
turn rear demister off
turn lights off
turn rear demister on (again)
turn parkers on (again)
turn rear demister off
turn lights off
release brake

The glow plug light should blink for 5 seconds to confirm reset has been successful

NB - the above steps need to be concluded in a speedy manner. You have a max of 4 seconds between each of the above steps.

If glow plug fails to blink the, let engine idle for 30 seconds, turn off engine for 15 seconds and retry.

Chip Tuning
